

“MP” Mortar Mixing Pump

1. Hopper
2. agitator
3. mixing pipe
4. grouting water
5. rotor and stator

1

- The integrated machine with mixing pipe, self-suck water pump, mini compressor and rotor/stator pump;
- Continuously mixing and pumping;
- Small and handy size and low weight, quickly and easily transport even in the most confined spaces;
- The rotor/stator pump ensures the materials is pumped and sprayed out continuously and evenly;
- The machine always works with efficiency and silence.
- With air valve remote-control function;
- The machine consists of portable units, permitting easy to operate and take maintenance and easy to use in any circumstance

Model		GP30
Voltage	V	380v/3PH/50Hz
Total Power	Kw	8.5
Main Electric Motor	Kw	5.5
Rated Output	L/min	30
Working Pressure	bar	30
Rotor Speed	rpm	380
Hopper Capacity	L	120
Overall Dimension	mm	1240x680x1550
Weight	Kg	280
