

Anti-foam AF-511

1

Silicone-containing antifoamer for a variety of applications in the textile industry, agriculture, catering, commercial kitchens, metal-processing industry as well as in the waste and process water management.

- Prevents reliably and quickly undesired foaming
- Based on silicone oils and therefore very efficient
- Milky white color
- Economical in consumption thanks to a high concentration
- Ecofriendly and easy to separate
- pH value (concentrate)= 6.5 – 7.0

Ready-for-use solution. The application amount depends on the extent of soiling. Spray undiluted and wipe using a lintfree cloth or leather.

Because of the great variety of applications, methods and material properties, this information sheet can only be a non-binding advice based on our experiences. No liability for any achievable results in an application can be derived from this. For Special purposes, a preliminary test for material compatibility has always to be carried out. We can not be held liable for any improper use and damages resulting from this. Official, in particular local, regulations must be observed. Our products are subject to technical changes.
