Oil Absorbent Pads

Our oil absorbent pads are 100% meltblown polypropylene and are hydrophobic meaning they absorb oil only and not water making them excellent for use when both oil and water are present. These pads float on water soaking up the oil from its surface making clean up quick and easy.

Our absorbent pads are:

- 100% Polypropylene.
- Absorb hydrocarbons not water.
- Light blue material turns dark when saturated.
- Excellent absorbent capacity.
- High strength even when fully saturated.
